# Remember Ebola? Pandemic Flu? Etc...

## Want to help scientists fight the next epidemic?

We are a group of scientists involved in responding to national and international outbreaks (e.g. Ebola)... and we need **YOU** to help us understand errors that happen when people collect data on computers. This knowledge will help us design slicker tools for data collection so we can respond better during an outbreak.

So join us for two workshops to

- **Learn more** about what we do to respond to outbreaks
- **Help scientists** design a data-entry tool which is fun
- **Make a difference** in our response to the next outbreak.

### When:

Workshop One – Thursday 23 March 2017, 6pm-8pm

Workshop Two – Thursday 27 April 2017, 6pm-8pm

### Where:

Imperial College, St Mary's Campus, Norfolk Place, Paddington, W2 1PG

*Light refreshments provided. Travel expenses within London Zone 5 will be reimbursed as well as your time in accordance with our Rewards, Payment & Recognition Guidance.*

**Interested and free on both dates?** For further detail and to register, contact:
